These monsters will help you solve
these puzzles!

When the game starts, there are blank squares in the puzzle. To play, fill in the blank squares according to the rules.

		3	4
4	3		1

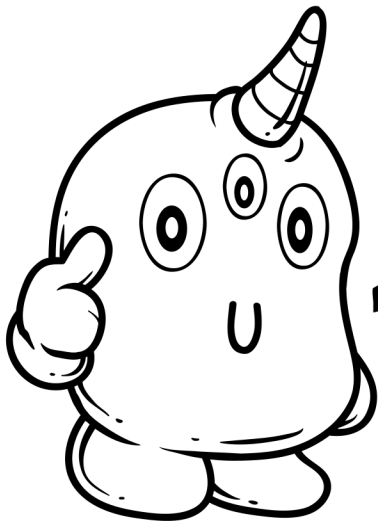

Rules:

1. Each row, column and "box" must contain all of the numbers.
2. No number may be repeated in any row, column or "box".

A "box" is defined by the highlighted square.

Sudoku

Don't worry.
We will solve
it together
step by step!

		3	4
4	3		1

To begin, we count how many squares are in each row. It's 4. That means that every row, column and box has the number 1, 2, 3, and 4.

The top row has the numbers 2 and 4. This means that it's missing the numbers 1 and 3.

The first column has the numbers 3 and 4. This means that it's missing the numbers 1 and 2.

Sudoku

This “box” has the numbers 2, 3, and 4. It’s missing the number 1.

How does this help me solve it?

Let's look at what we know about the outlined blank square.

From the ROW: Can be 1 or 3

From the COLUMN: Can be 1 or 2

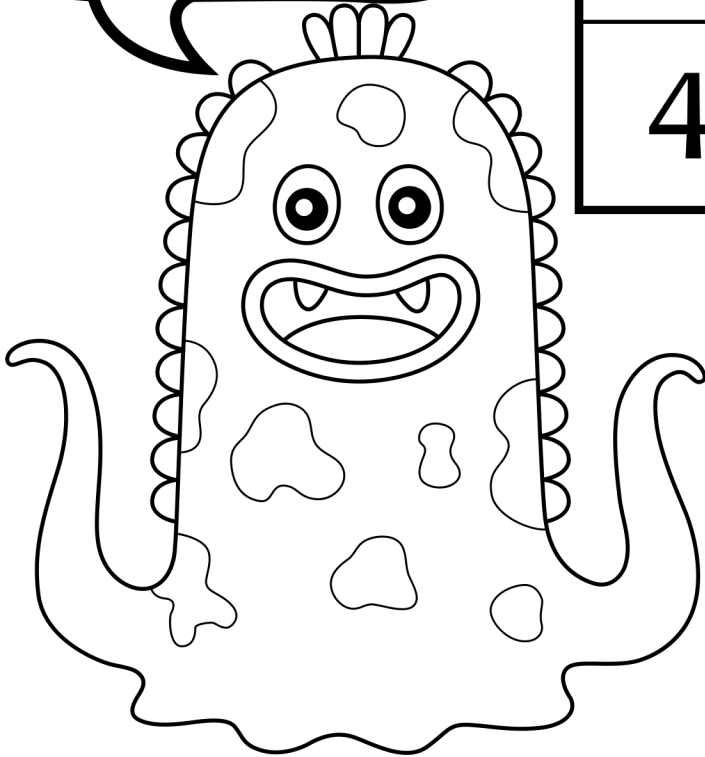

From the BOX: Can be 1

Aha, only the number 1 can be the solution for the ROW, COLUMN and the BOX! It must be 1!
